

Quick Installation Guide For Neuralium Mobile Accounts.

Mobile wallet type publication on launch

The *mobile* account publication process has some special consideration:

- We will emit some blocks to confirm the accounts from Jan 3^h to Jan 17nd. Until then your publication would be success but your mobile account will have a **Dispatched** status until block emission resume and your account is confirmed in the next block.
- In order to be fair with everyone, mining is put on hold until January 18th. This is to ensure that everyone has a chance to verify an account and be ready for the mining start.

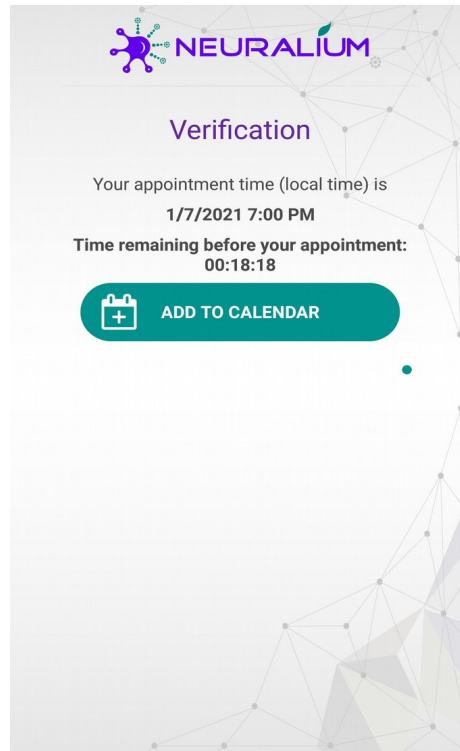

Steps to publish a Mobile account:

<p>Verification Process</p> <p>After the wallet and account has been created, you have to request an appointment in order to complete the verification process.</p> <p>The verification process intends to create an entrance door that will allow honest users to pass with minimal effort while making it very difficult for scammers to create a large number of fraudulent accounts on the system.</p>	
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------

Receive Appointment confirmation

Once the request has been submitted, it may take a few minutes to a few hours to receive confirmation. Once the response is received, the date and time of the appointment will be set. There is nothing to do at this point other than wait and be present for the appointment date and time.

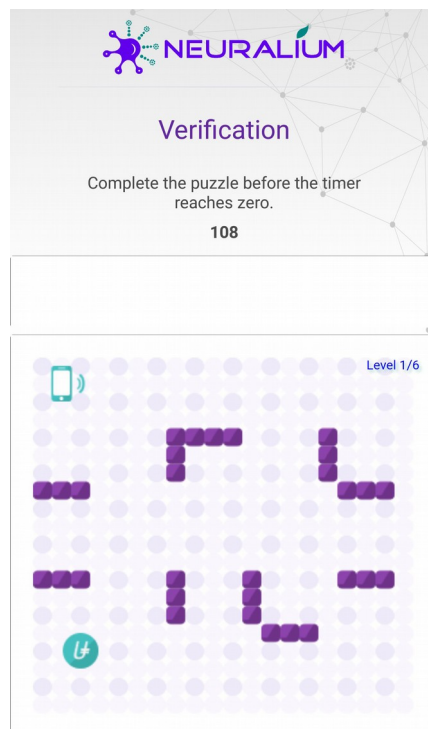

During this wait time, you may close the app and return later before the appointment.

Attend the Appointment

Make sure you are there on time! Even maybe arrive a few minutes before.

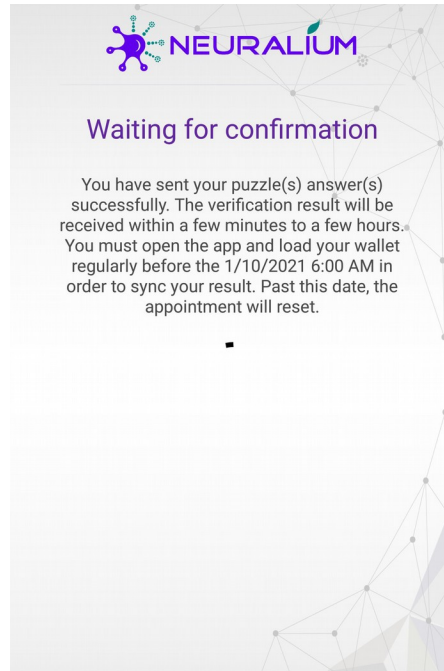

On the date and time of the appointment, make sure you are present on time and the GUI wizards will guide you through the process. Complete the puzzles as they are displayed and then wait for confirmation.

Waiting for confirmation of the verification process.

It may take a few minutes or a few hours to receive a confirmation. We have to be patient.

You can safely close the application at this state. Remember to open and load your wallet in the next 24 hours, otherwise you could miss your confirmation. Then you will be able to complete the process and publish your account in the blockchain.

**Step 2: Publish your Account**

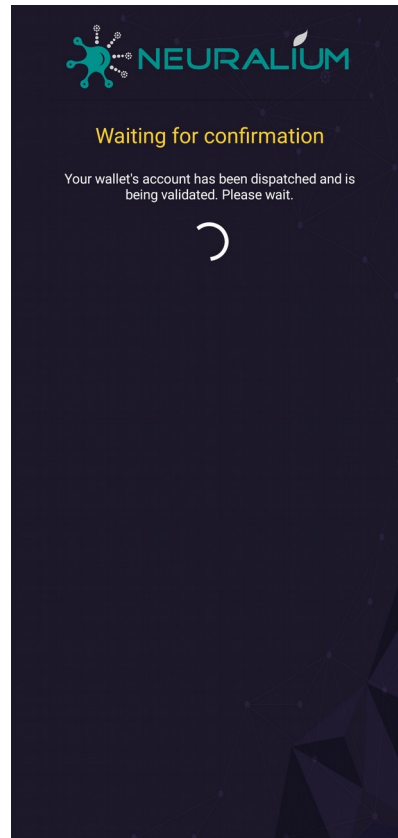

After you received the confirmation you immediately will be able to publish your account. Click Publish account.

**Waiting for confirmation :
Wallet Dispatched.**

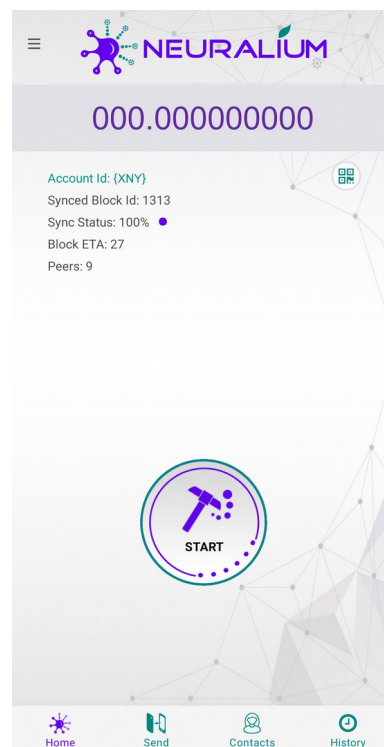

Because we are in launch phase, the block emission is currently paused, so your Account will have a Dispatched status until a block is eventually created (this could take some hours or days). There may be a few blocks created before January 18th, but the regular blockchain emission will resume on this date.

When you are in this screen, it is normal to wait a long time and you are succesful.

Account Published

Congratulations! Your account has been published! You are ready to mine on January 18th 2021!

Troubleshooting

I try to make the appointments and I never see the puzzle.

Some people may have network issues that may prevent them from making the appointment correctly. It could be due to firewalls, antivirus, even internet service providers (ISP) sometimes block ports like the one we use. In this case, there is nothing we can do. You could try to contact your ISP and ask them to open ports 32888 and 33888.

In China, a VPN seems to be required.
